Environmental Policy Statement

- All present and future operations of Express Engineering will, as a minimum, comply with relevant environmental legislation and standards to prevent pollution.
- We will strive to develop manufacturing processes with minimum environmental impact, particularly the disposal and recycling of “swarf”/waste metals and machine oils.
- We will reduce the amount of waste we create: we will minimise our use of materials, use materials longer where practicable and always investigate recycling opportunities for used materials.
- We will educate, train and motivate our employees to carry out their tasks in an environmentally responsible manner.
- We will periodically conduct environmental audits in order to continually improve our environmental performance and perform environmental assessments when a process is changed.
- The Managing Director and his team will have the responsibility for the environmental impact of the company’s operations and the continual development of the company’s commitment to protect the environment.
- Objectives and targets, form a key part of Express Engineering’s Environmental Management System, they are reviewed for suitability, along with this Environmental Policy, at Environmental Management Review meetings, which are held at least annually.
- We will invite opinions and feedback on our methods and goals from inside and outside the company. Copies of this Environmental Policy are available to the public via the company’s website - www.express-engineering.co.uk.

Signed:

A handwritten signature in blue ink, appearing to read 'C. Thompson', is written over a light blue horizontal line.

Chris Thompson (Chief Executive)
